

Salmon River Restoration Council (SRRC)
 PO Box 1089
 25631 Sawyers Bar RD
 Sawyers Bar, CA 96027

Phone: 530-462-4665
 Fax: 530-462-4664
 e-mail: srrc@srrc.org
 website: www.srrc.org

Become a member of the SRRC

The Salmon River Restoration Council counts on the support of people who know and love the Salmon River. When you support SRRC, you are helping restore our spectacular river and its watershed, and contributing to the creation of a sustainable local economy.

Winter Steelhead - \$25
 Fall Chinook - \$50
 Coho - \$100
 Green Sturgeon - \$250
 Spring Chinook - \$500 or more

Stop in if you are passing by our Watershed Center in Sawyers Bar for:

- public computers,
- wireless Internet access,
- a media library,
- up to date information center,
- history archive,
- meeting space,
- copy and fax services and more

The Watershed Center is open most weekdays and provides office space, as well as room for seminars and workshops.

The SRRC would like to thank our current funders for their essential support: CA Dept. of Fish & Wildlife, US Fish & Wildlife Service, US Forest Service, Karuk Tribe, National Fish and Wildlife Foundation, National Forest Foundation, Firedoll Foundation, Trees Foundation, Ford Family Foundation, Sidney Stern Memorial Trust, Cliff Bar Foundation, and the Yellow Chair Foundation.

All members will receive SRRC's newsletters and annual report. Members at Coho level receive a card gift pack. Green Sturgeon and above have their choice of a T-shirt, or gift card pack.

"The aquatic and terrestrial ecosystems are the single most important factor in determining the ecological and economic well-being of our rural riverine communities."

— Salmon River Restoration Council
 Community Restoration Plan

Salmon River Restoration Council's mission is to restore, maintain, and protect the Salmon River ecosystems through stakeholder collaboration, highlighting active community participation and the development of a sustainable economy based on ecological compatibility.

Long Term Goals

- **Enlist** community members in a cooperative approach to protect and restore the Salmon River ecosystem.
- **Increase** public awareness and good stewardship through education and outreach
- **Create** economic stability in the community by diversifying restoration based job opportunities.
- **Promote** the collaborative stakeholder partnerships needed for the restoration of the Salmon River.
- **Help** fill the resource management gaps left by traditional large governmental agencies which have a difficult time conceptualizing and implementing small or non-traditional projects.
- **Work** to increase ecosystem resiliency in a changing environment through program implementation

The Salmon River Restoration Council (SRRC) is a non-profit organization that has been serving California's Salmon River watershed and its community since 1992. We work cooperatively to assess, protect, maintain, and restore the ecosystems of the spectacular Salmon River.

With the active participation of the local community, our projects focus on anadromous fisheries resources and the development of a sustainable economy. Strong community partnerships are essential to our work.

We believe that educating and empowering the river community to become effective stewards of the ecosystem is a centerpiece in the recovery of our watershed and in particular the declining fisheries resource.

We work to foster the health and well being of our region and its inhabitants through a variety of projects and programs. The programs include our:

- **Fisheries Program** - engages in cooperative fisheries monitoring, research, and habitat restoration for multiple species throughout the Salmon River watershed; improves fish passage to spawning and rearing habitat.
- **Cooperative Noxious Weed Program** - a community-based approach to eradicating noxious weeds in our watershed using manual control methods rather than toxic herbicides.
- **Fire, Fuels and Forestry Program** - promotes a collaborative approach to fire planning and fuels reduction projects in the Salmon River landscape.
- **Water Quality Monitoring Program** - monitors water quality and quantity on the Salmon River and its tributaries in order to better promote and understand the health of the river and its fisheries.
- **Habitat Restoration Program** - prioritizes cooperation amongst different stakeholders and agencies to protect and restore native fisheries in the Salmon River and seeks to improve aquatic habitat by restoring the function of roads, floodplains, riparian areas and related in-stream habitat.
- **Watershed Education Program** - integrates watershed and fisheries awareness into the curricula of the two Salmon River schools.
- **River Clean-Up Program** - helps maintain a clean and litter-free watershed.
